Photochemistry and Photobiology

The official journal of the American Society for Photobiology • Volume 72 • No. 1 • July 2000

PHOTOCHEMISTRY, PHOTOPHYSICS AND PHOTOTECHNOLOGY

1 Photo-oxidation of methionine-containing peptides by the 4-carboxybenzophenone triplet state in aqueous solution. Competition between intramolecular two-centered three-electron bonded $(S.\therefore S)^+$ and $(S.\therefore N)^+$ formation

Gordon L. Hug, Krzysztof Bobrowski, Halina Kozubek, Bronisław Marciniak

10 The photophysical properties of menthyl anthranilate: A UV-A sunscreen

Andrew Beeby, Allison E. Jones

16 Protein changes in HL60 leukemia cells associated with 5-aminolevulinic acid-based photodynamic therapy. Early effects on endoplasmic reticulum chaperones

Dana Grebeňová, Petr Halada, Jiří Stulík, Vladimír Havlíček, Zbyněk Hrkal

23 Photoaddition of 4,6-dimethyl-tetrahydrobenzoangelicin to thymine in DNA: X-ray studies and experiments with model oligonucleotides

Sergio Caffieri, Giorgia Miolo, Francesco Dall'Acqua, Franco Benetollo, Gabriella Bombieri

28 A ruthenium probe for cell viability measurement using flow cytometry, confocal microscopy and time-resolved luminescence

M. Emilia Jiménez-Hernández, Guillermo Orellana, Francisco Montero, M. Teresa Portolés

35 Conformational changes induced in the Tet repressor protein TetR(B) upon operator or anhydrotetracycline binding as revealed by time-resolved fluorescence spectroscopy on single tryptophan mutants

Michael Kunz, Martin Kintrup, Wolfgang Hillen, Siegfried Schneider

49 *Meso*-substituted cationic porphyrins of biological interest. Photophysical and physicochemical properties in solution and bound to liposomes

Nora G. Angeli, M. Gabriela Lagorio, Enrique A. San Román, Lelia E. Dicelio

57 Active uptake of drugs into photosensitive liposomes and rapid release on UV photolysis

Roger H. Bisby, Carole Mead, Christopher G. Morgan

ENVIRONMENTAL PHOTOBIOLOGY AND UVR EFFECTS

62 Damage to DNA in bacterioplankton: A model of damage by ultraviolet radiation and its repair as influenced by vertical mixing

Yannick Huot, Wade H. Jeffrey, Richard F. Davis, John J. Cullen

PHOTOSYNTHESIS AND PHOTOCONVERSION

75 The effect of decreasing temperature up to chilling values on the *in vivo* F685/F735 chlorophyll fluorescence ratio in *Phaseolus vulgaris* and *Pisum sativum*: The role of the photosystem I contribution to the 735 nm fluorescence band

Giovanni Agati, Zoran G. Cerovic, Ismaël Moya

85 Spectroscopic properties of protochlorophyllide analyzed *in situ* in the course of etiolation and in illuminated leaves

Benoit Schoefs, Martine Bertrand, Fabrice Franck

PHOTOMEDICINE

94 Pharmacokinetics of ICG and HHPH-car for the detection of normal and tumor tissue using fluorescence, near-infrared reflectance imaging: A case study

Michael Gurfinkel, Alan B. Thompson, William Ralston, Tamara L. Troy, Ana L. Moore, Thomas A. Moore, J. Devens Gust, Derreck Tatman, Jeffery S. Reynolds, Bruce Muggenburg, Kristin Nikula, Ravindra Pandey, Ralf H. Mayer, Daniel J. Hawrysz, Eva M. Sevick-Muraca

103 Optimal excitation wavelengths for *in vivo* detection of oral neoplasia using fluorescence spectroscopy

Douglas L. Heintzelman, Urs Utzinger, Holger Fuchs, Andres Zuluaga, Kirk Gossage, Ann M. Gillenwater, Rhonda Jacob, Bonnie Kemp, Rebecca R. Richards-Kortum

114 Subcellular localization of merocyanine 540 (MC540) and induction of apoptosis in murine myeloid leukemia cells

J. Y. Chen, N. H. Cheung, M. C. Fung, J. M. Wen, W. N. Leung, N. K. Mak

121 Photosensitization of red blood cell hemolysis by lutetium texaphyrin

Mehmet D. Bilgin, M-Ali Al-Akhras, Mahmoud Khalili, Hila Hemmati, Leonard I. Grossweiner

128 Photodynamic therapy of human glioma spheroids using 5-aminolevulinic acid

Steen J. Madsen, Chung-Ho Sun, Bruce J. Tromberg, Vincent P. Wallace, Henry Hirschberg

PHOTOSENSORY BIOLOGY

135 UVB-induced epidermal growth factor receptor phosphorylation is critical for downstream signaling and keratinocyte survival

Dominik Peus, Remus A. Vasa, Alexander Meves, Astrid Beyerle, Mark R. Pittelkow

141 Effects of three characteristic amino acid residues of *Pharaonis* phoborhodopsin on the absorption maximum
Kazumi Shimono, Masayuki Iwamoto, Masato Sumi, Naoki Kamo

RAPID COMMUNICATION

146 *In vivo* near-infrared Raman spectroscopy: Demonstration of feasibility during clinical gastrointestinal endoscopy
Martin G. Shim, Louis-Michel Wong Kee Song, Norman E. Marcon, Brian C. Wilson

Photochemistry and Photobiology

The official journal of the American Society for Photobiology • Volume 72 • No. 2 • August 2000

PHOTOCHEMISTRY, PHOTOPHYSICS AND PHOTOTECHNOLOGY

151 Study of nonlinear optical properties of multilayer Langmuir–Blodgett films containing bacteriorhodopsin

Yu. O. Barmenkov, A. V. Kir'yanov, A. N. Starodumov, I. A. Maslyanitsyn, V. D. Shigorin, H. Lemmetyinen

155 Reactions of psoralen radical cations with biological substrates

Paul D. Wood, Anisa Mnyusiwalla, Lie Chen, Linda J. Johnston

163 Photodecarboxylation of ketoprofen in aqueous solution. A time-resolved laser-induced optoacoustic study

Claudio D. Borsarelli, Silvia E. Braslavsky, Salvatore Sortino, Giancarlo Marconi, Sandra Monti

172 A theoretical approach of the measurement of osmotic fragility of erythrocytes by optical transmission

Paul Mazeron, Jacques Didelon, Stéphane Muller, Jean-François Stoltz

179 Effect of solvent–water mixtures on the prototropic equilibria of fluorescein and on the spectral properties of the monoanion

Nectarios Klonis, William H. Sawyer

ENVIRONMENTAL PHOTOBIOLOGY AND UVR EFFECTS

186 Phototransformations of 5-aminolevulinic acid–induced protoporphyrin IX *in vitro*: A spectroscopic study

Saulius Bagdonas, Li-Wei Ma, Vladimir Iani, Ricardas Rotomskis, Petras Juzenas, Johan Moan

193 Variability of bio-optical factors influencing the seasonal attenuation of ultraviolet radiation in temperate coastal waters of Japan

Victor S. Kuwahara, Hiroshi Ogawa, Tatsuki Toda, Tomohiko Kikuchi, Satoru Taguchi

200 Photooxidation of lens α-crystallin by hypericin (active ingredient in St. John's Wort)

K. L. Schey, S. Patat, C. F. Chignell, M. Datillo, R. H. Wang, J. E. Roberts

PHOTOSYNTHESIS AND PHOTOCONVERSION

204 Photophysical consequences of coupling bacteriochlorophyll *a* with serine and its resulting solubility in water

I. Eichwurzel, H. Stiel, K. Teuchner, D. Leupold, H. Scheer, Y. Salomon, A. Scherz

PHOTOMEDICINE

210 Light-induced apoptosis involves a defined sequence of cytoplasmic and nuclear calcium release in $AlPcS_4$-photosensitized rat bladder RR 1022 epithelial cells

Angelika Rück, Klaus Heckelsmiller, Roland Kaufmann, Nili Grossman, Elke Haseroth, Nermin Akgün

217 Part 2. *meso*-Tetraphenylporphyrin dimer derivatives as potential photosensitizers in photodynamic therapy

Maria A. F. Faustino, Maria G. P. M. S. Neves, José A. S. Cavaleiro, Marcus Neumann, Hans-D. Brauer, Giulio Jori

226 Cell-type specific protoporphyrin IX metabolism in human bladder cancer *in vitro*

René C. Krieg, Sonja Fickweiler, Otto S. Wolfbeis, Ruth Knuechel

234 Macromolecular contrast agents for optical imaging of tumors: Comparison of indotricarbocyanine-labeled human serum albumin and transferrin

Andreas Becker, Björn Riefke, Bernd Ebert, Uwe Sukowski, Herbert Rinneberg, Wolfhard Semmler, Kai Licha

242 Optical detection of triggered atherosclerotic plaque disruption by fluorescence emission analysis

Alexander Christov, Erbin Dai, Maria Drangova, Liying Liu, George S. Abela, Piers Nash, Grant McFadden, Alexandra Lucas

253 UV exposure alters respiratory allergic responses in mice

Henk Van Loveren, André Boonstra, Mariska Van Dijk, Angelique Fluitman, Huub F. J. Savelkoul, Johan Garssen

260 Induction, distribution and repair of UV photodamage in the platyfish, *Xiphophorus signum*

Jarah A. Meador, Ronald B. Walter, David L. Mitchell

PHOTOSENSORY BIOLOGY

267 Bioluminescence color determinants of *Phrixothrix* railroad-worm luciferases: Chimeric luciferases, site-directed mutagenesis of Arg 215 and guanidine effect

V. R. Viviani, Y. Ohmiya

Photochemistry and Photobiology

The official journal of the American Society for Photobiology • Volume 72 • No. 3 • September 2000

INVITED REVIEW

273 Phototropism: A "simple" physiological response modulated by multiple interacting photosensory-response pathways

Emmanuel Liscum, Emily L. Stowe-Evans

PHOTOCHEMISTRY, PHOTOPHYSICS AND PHOTOTECHNOLOGY

283 Primary photophysical properties of ofloxacin

Suppiah Navaratnam, Jennifer Claridge

291 Sequence specificity of alkali-labile DNA damage photosensitized by suprofen

Sharon M Starrs, R. Jeremy H. Davies

298 Binding and photoreactivity of psoralen linked to triple helix–forming oligonucleotides

Dennis H. Oh, Philip C. Hanawalt

ENVIRONMENTAL PHOTOBIOLOGY AND UVR EFFECTS

308 Impact of UV radiation on the early development of the giant kelp (*Macrocystis pyrifera*) gametophytes

Pirjo S. Huovinen, Aimo O.J. Oikari, Markus R. Soimasuo, Gary N. Cherr

314 Biological weighting function for the mortality of *Boeckella gracilipes* (Copepoda, Crustacea) derived from experiments with natural solar radiation

Barbara Tartarotti, Walter Cravero, Horacio E. Zagarese

320 A novel express bioassay for detecting toxic substances in water by recording rhodopsin-mediated photoelectric responses in *Chlamydomonas* cell suspensions

Elena G. Govorunova, Ilya M. Altschuler, Donat-P. Häder, Oleg A. Sineshchekov

327 Ultraviolet-B radiation effects on antioxidant status and survival in the Zebrafish, *Brachydanio rerio*

Richard A. Charron, James C. Fenwick, David R. S. Lean, Thomas W. Moon

334 Differential activation of ERK 1/2 and JNK in normal human fibroblast-like cells in response to UVC radiation under different oxygen tensions

Naoki Matsuda, Miwa Horikawa, Li-Hong Wang, Masahiro Yoshida, Kumio Okaichi, Yutaka Okumura, Masami Watanabe

340 Common fluorescent sunlamps are an inappropriate substitute for sunlight

Douglas B. Brown, Adam E. Peritz, David L. Mitchell, Stephanie Chiarello, Jouni Uitto, Francis P. Gasparro

PHOTOSYNTHESIS AND PHOTOCONVERSION

345 Quenching of bacteriochlorophyll fluorescence in chlorosomes from *Chloroflexus aurantiacus* by exogenous quinones

Seiji Tokita, Niels-Ulrik Frigaard, Masamitsu Hirota, Keizo Shimada, Katsumi Matsuura

351 Non-photosynthetic reduction of the intersystem electron transport chain of chloroplasts following heat stress. Steady state rate

Nikolai G. Bukhov, Guy Samson, Robert Carpentier

PHOTOMEDICINE

358 *In vivo* photodynamic characteristics of the near-infrared photosensitizer 5,10,15,20-tetrakis(*m*-hydroxyphenyl) bacteriochlorin

Jeroen P. Rovers, Martin L. de Jode, Hadjira Rezzoug, Michael F. Grahn

365 Partial complementation of the DNA repair defects in cells from xeroderma pigmentosum groups A, C, D, and F but not G by the *denV* gene from bacteriophage T4

Murray A. Francis, Paramjeet Bagga, Raghbir Athwal, Andrew J. Rainbow

374 Exposure to UVB induces accumulation of LFA-1$^+$ T cells and enhanced expression of the chemokine psoriasin in normal human skin

Sergio Di Nuzzo, Regien M. R. Sylva-Steenland, Cornelis W. Koomen, Menno A. de Rie, Pranab K. Das, Jan D. Bos, Marcel B. M. Teunissen

383 Effects of the menstrual cycle on the red and near-infrared optical properties of the human breast

Rinaldo Cubeddu, Cosimo D'Andrea, Antonio Pifferi, Paola Taroni, Alessandro Torricelli, Gianluca Valentini

392 Hydrophilic cyanine dyes as contrast agents for near-infrared tumor imaging: Synthesis, photophysical properties and spectroscopic *in vivo* characterization

Kai Licha, Björn Riefke, Vasilis Ntziachristos, Andreas Becker, Britton Chance, Wolfhard Semmler

399 Protoporphyrin IX fluorescence kinetics and localization after topical application of ALA pentyl ester and ALA on hairless mouse skin with UVB-induced early skin cancer

Johanna T. H. M. van den Akker, Henriëtte S. de Bruijn, Gerard M. J. Beijersbergen van Henegouwen, Willem M. Star, Henricus J. C. M. Sterenborg

407 Induction of primary cutaneous melanomas in C3H mice by combined treatment with ultraviolet radiation, ethanol, and aloe emodin
Faith M. Strickland, H. Konrad Muller, L. Clifton Stephens, Corazon D. Bucana, Cherrie K. Donawho, Yan Sun, Ronald P. Pelley

PHOTOSENSORY BIOLOGY

415 Fluorescence properties of pyrylretinol
Joydip Das, Rosalie K. Crouch, Parkson Lee-Gau Chong

Photochemistry and Photobiology

The official journal of the American Society for Photobiology • Volume 72 • No. 4 • October 2000

INVITED REVIEW

421 On spectral relaxation in proteins
Joseph R. Lakowicz

PHOTOCHEMISTRY, PHOTOPHYSICS AND PHOTOTECHNOLOGY

438 Rotational relaxation of neutral red in alkanes: Effect of solvent size on probe rotation
M. K. Singh

444 The location of tryptophan, *N*-acetyltryptophan and α-chymotrypsin in reverse micelles of AOT: A fluorescence study
Suzana M. Andrade, Sílvia M. B. Costa

451 A laser flash photolysis and pulse radiolysis study of primary photochemical processes of flumequine
M. Bazin, F. Bosca, M. L. Marin, M. A. Miranda, L. K. Patterson, R. Santus

458 Alteration of the endocytotic pathway by photosensitization with fluoroquinolones
G. Ouédraogo, P. Morlière, C. Mazière, J. C. Mazière, R. Santus

464 Photooxidation of cedrelone, a tetranortriterpenoid from *Toona ciliata*
Geetha Gopalakrishnan, N. D. Pradeep Singh, V. Kasinath, R. Malathi, S. S. Rajan

467 Photochemical studies on xanthurenic acid
Joan E. Roberts, James F. Wishart, Lydia Martinez, Colin F. Chignell

472 Photochemical and photobiological properties of new bispsoralen derivatives (Bis[PsC_n]PIP, n = 4, 6, 8)
Sung Ki Kim, Han Oh Park, Sang Chul Shim

ENVIRONMENTAL PHOTOBIOLOGY AND UVR EFFECTS

477 Fluorometric analysis of DNA unwinding (FADU) as a method for detecting repair-induced DNA strand breaks in UV-irradiated mammalian cells
Christa Baumstark-Khan, Uwe Hentschel, Yelizabeta Nikandrova, Jens Krug, Gerda Horneck

485 UVAI-induced edema and pyrimidine dimers in murine skin
Ronald D. Ley, Anny Fourtanier

488 Annual and interannual behavior of solar ultraviolet irradiance revealed by broadband measurements
John E. Frederick, James R. Slusser, David S. Bigelow

497 Exposure to ultraviolet radiation enhances mortality and pathology associated with influenza virus infection in mice
Lisa K. Ryan, Donna L. Neldon, Lisa R. Bishop, M. Ian Gilmour, Mary J. Daniels, Denise M. Sailstad, Mary Jane K. Selgrade

PHOTOSYNTHESIS AND PHOTOCONVERSION

508 Degradation of the photosystem I complex during photoinhibition
Yu Hui, Wei Jie, Robert Carpentier

513 Inhibition of photosynthetic electron transport by UV-A radiation targets the photosystem II complex
Enikö Turcsányi, Imre Vass

PHOTOMEDICINE

521 Photodetection with 5-aminolevulinic acid–induced protoporphyrin IX in the rat abdominal cavity: Drug-dose–dependent fluorescence kinetics
Maurice C. G. Aalders, Henricus J. C. M. Sterenborg, Fiona A. Stewart, Nine van der Vange

526 Increased eumelanin expression and tanning is induced by a superpotent melanotropin [Nle^4-D-Phe^7]-α-MSH in humans
Robert T. Dorr, Katerina Dvorakova, Christine Brooks, Ruskin Lines, Norman Levine, Karl Schram, Petra Miketova, Victor Hruby, David S. Alberts

533 Scavenger-receptor targeted photodynamic therapy
Michael R. Hamblin, Jaimie L. Miller, Bernhard Ortel

541 The binding characteristics and intracellular localization of temoporfin (*m*THPC) in myeloid leukemia cells: Phototoxicity and mitochondrial damage
J. Y. Chen, N. K. Mak, C. M. N. Yow, M. C. Fung, L. C. Chiu, W. N. Leung, N. H. Cheung

548 Singlet oxygen, but not oxidizing radicals, induces apoptosis in HL-60 cells
Irene E. Kochevar, Mary C. Lynch, Shougang Zhuang, Christopher R. Lambert

554 UV-enhanced expression of a reporter gene is induced at lower UV fluences in transcription-coupled repair deficient compared to normal human fibroblasts, and is absent in SV40-transformed counterparts
Murray A. Francis, Andrew J. Rainbow

562 Lack of correlation between DNA strand breakage and p53 protein levels in human fibroblast strains exposed to ultraviolet light
Louise Enns, David Murray, Razmik Mirzayans

569 Comparison of the pharmacokinetics and phototoxicity of protoporphyrin IX metabolized from 5-aminolevulinic acid and two derivatives in human skin *in vivo*

Sandra Gerscher, James P. Connelly, John Griffiths, Stanley B. Brown, Alexander J. MacRobert, Gavin Wong, Lesley E. Rhodes

PHOTOSENSORY BIOLOGY

575 Induction of photolyase activity in wood frog (*Rana sylvatica*) embryos

M. Alex Smith, Carolyn M. Kapron, Michael Berrill

RAPID COMMUNICATION

579 Photoactivation of vascular iNOS and elevation of cGMP *in vivo*: Possible mechanism for photovasorelaxation and inhibition of restenosis in an atherosclerotic rabbit model

Nicholas Kipshidze, Michael H. Keelan, John R. Petersen, Ivan Bachutashvili, Jafar Vossoughi, John Karanian, Chandramallika Ghosh, Patrick Iversen, Gary S. Roubin, Martin B. Leon, Jeffrey W. Moses

Photochemistry and Photobiology

The official journal of the American Society for Photobiology • Volume 72 • No. 5 • November 2000

PHOTOCHEMISTRY, PHOTOPHYSICS AND PHOTOTECHNOLOGY

583 Mechanism of DNA damage photosensitized by trisbipyrazyl ruthenium complex. Unusual role of Cu/Zn superoxide dismutase

Etienne Gicquel, Nicole Paillous, Patricia Vicendo

590 Time-resolved thermodynamic changes photoinduced in 5,12-*trans*-locked bacteriorhodopsin. Evidence that retinal isomerization is required for protein activation.

Aba Losi, Ingolf Michler, Wolfgang Gärtner, Silvia E. Braslavsky

598 Driving force and electronic coupling effects on photoinduced electron transfer in a fullerene-based molecular triad

Jeffrey L. Bahr, Darius Kuciauskas, Paul A. Liddell, Ana L. Moore, Thomas A. Moore, Devens Gust

612 Effect of pH on the fluorescence and absorption spectra of hypericin in reverse micelles

P. K. Chowdhury, K. D. Ashby, A. Datta, J. W. Petrich

619 *N*-hydroxy-4-(4-chlorophenyl)thiazole-2(3*H*)-thione as a photochemical hydroxyl-radical source: Photochemistry and oxidative damage of DNA (strand breaks) and 2′-deoxyguanosine (8-oxodG formation)

Waldemar Adam, Jens Hartung, Hideki Okamoto, Chantu R. Saha-Möller, Kristina Špehar

625 Effect of solvent on the excited-state photophysical properties of curcumin

Sujata M. Khopde, K. Indira Priyadarsini, Dipak K. Palit, Tulsi Mukherjee

632 Photochromic behaviour of 2,2-spiro-adamantylidene-2H-naphtho[1,2-b]pyran: A new thermoreversible and photoreversible photochromic system

G. Favaro, A. Romani, R. S Becker

639 Probing the primary event in the photocycle of photoactive yellow protein using photochemical hole-burning technique

Tina Masciangioli, Savitha Devanathan, Michael A. Cusanovich, Gordon Tollin, Mostafa A. El-Sayed

ENVIRONMENTAL PHOTOBIOLOGY AND UVR EFFECTS

645 Effects of UV irradiation on skin and nonskin-associated herpes simplex virus infections in rats

Johan Garssen, Renate van der Molen, Arja de Klerk, Mary Norval, Henk van Loveren

652 Influence of UV radiation on four freshwater invertebrates

Alina Cywinska, D. Crump, D. Lean

PHOTOSYNTHESIS AND PHOTOCONVERSION

660 Photoactive protochlorophyllide regeneration in cotyledons and leaves from higher plants

Benoît Schoefs, Martine Bertrand, Christiane Funk

669 Nanosecond laser photolysis studies of chlorosomes and artificial aggregates containing bacteriochlorophyll *e*: Evidence for the proximity of carotenoids and bacteriochlorophyll *a* in chlorosomes from *Chlorobium phaeobacteroides* strain CL1401

Juan B. Arellano, Thor Bernt Melø, Carles M. Borrego, Jesús Garcia-Gil, K. Razi Naqvi

PHOTOMEDICINE

676 The effect of photodynamic action on two virulence factors of gram-negative bacteria

Nurgül Kömerik, Michael Wilson, Steve Poole

681 Topical application of 5-aminolevulinic acid hexyl ester and 5-aminolevulinic acid to normal nude mouse skin: Differences in protoporphyrin IX fluorescence kinetics and the role of the stratum corneum

Johanna T. H. M. van den Akker, Vladimir Iani, Willem M. Star, Henricus J. C. M. Sterenborg, Johan Moan

690 Fluorescence imaging during photodynamic therapy of experimental tumors in mice sensitized with disulphonated aluminum phthalocyanine

Rinaldo Cubeddu, Antonio Pifferi, Paola Taroni, Alessandro Torricelli, Gianluca Valentini, Daniela Comelli, Cosimo D'Andrea, Valentina Angelini, Gianfranco Canti

696 PEG-*m*-THPC-mediated photodynamic effects on normal rat tissues

René Hornung, Mathias K. Fehr, Heinrich Walt, Pius Wyss, Michael W. Berns, Yona Tadir

701 The dose dependence of cyclobutane dimer induction and repair in UVB-irradiated human keratinocytes

Rüdiger Greinert, Oliver Boguhn, Dietrich Harder, Eckhard Wilhelm Breitbart, David L. Mitchell, Beate Volkmer

PHOTOSENSORY BIOLOGY

709 Analyses of structure of photoreceptor organelle and blepharismin-associated protein in unicellular eukaryote *Blepharisma*

Tatsuomi Matsuoka, Daisuke Tokumori, Hiyoshizo Kotsuki, Masaki Ishida, Motoaki Matsushita, Satoshi Kimura, Takao Itoh, Giovanni Checcucci

714 Water and carboxyl group environments in the dehydration blue shift of bacteriorhodopsin

Robert Renthal, Nicholas Gracia, Ruben Regalado

Photochemistry and Photobiology

The official journal of the American Society for Photobiology • Volume 72 • No. 6 • December 2000

PHOTOCHEMISTRY, PHOTOPHYSICS AND PHOTOTECHNOLOGY

719 Conformational effects on photophysical characteristics of C5-C5'-linked dihydrothymine dimers in solution

T. Ito, H. Shinohara, S. Nishimoto

727 Photomodulated azoaldolase: A model for light intervention in biological systems?

Giorgio Montagnoli, Adriano Podestà, Silvano Bonaretti

731 "Hot spots" associated with the photoinduced binding of *cis*-dichloro bis(1,10 phenanthroline)-rhodium(III) chloride to HIV-1 and c-raf DNA

Harry Morrison, Herbert Harmon

ENVIRONMENTAL PHOTOBIOLOGY AND UVR EFFECTS

739 Comparisons of spore dosimetry and spectral photometry of solar-UV radiation at four sites in Japan and Europe

Nobuo Munakata, Stelios Kazadzis, Alkiviadis F. Bais, Kotaro Hieda, Györgyi Rontó, Petra Rettberg, Gerda Horneck

746 Inactivation of iron responsive element–binding capacity and aconitase function of iron regulatory protein-1 of skin cells by ultraviolet A

Anne Giordani, Marie-Elise Martin, Carole Beaumont, René Santus, Patrice Morlière

753 Effect of column ozone on the variability of biologically effective UV radiation at high southern latitudes

Igor Sobolev

766 The effect of a vitamin A acetate diet on ultraviolet radiation–induced immune suppression as measured by contact hypersensitivity in mice

Denise M. Sailstad, Elizabeth H. Boykin, Ralph Slade, Donald L. Doerfler, MaryJane K. Selgrade

PHOTOSYNTHESIS AND PHOTOCONVERSION

772 Protection of photosystem II against UV-A and UV-B radiation in the cyanobacterium *Plectonema boryanum*: The role of growth temperature and growth irradiance

Alexander G. Ivanov, Ewa Miskiewicz, Adrian K. Clarke, Bruce M. Greenberg, Norman P. A. Huner

780 Eradication of multiple myeloma and breast cancer cells by TH9402-mediated photodynamic therapy: Implication for clinical *ex vivo* purging of autologous stem cell transplants

N. Brasseur, I. Ménard, A. Forget, R. El Jastimi, R. Hamel, N. A. Molfino, J. E. van Lier

PHOTOMEDICINE

788 Kinetics of ultraviolet light–induced cyclobutane pyrimidine dimers in human skin *in vivo*: An immunohistochemical analysis of both epidermis and dermis

Santosh K. Katiyar, Mary S. Matsui, Hasan Mukhtar

794 Topical 5-aminolevulinic acid-photodynamic therapy of hairless mouse skin using two-fold illumination schemes: PpIX fluorescence kinetics, photobleaching and biological effect

Dominic J. Robinson, Henriëtte S. de Bruijn, W. Johannes de Wolf, Henricus J. C. M. Sterenborg, Willem M. Star

803 UVB-induced conversion of 7-dehydrocholesterol to 1α,25-dihydroxyvitamin D_3 (calcitriol) in the human keratinocyte line HaCaT

Bodo Lehmann, Peter Knuschke, Michael Meurer

810 Genetic variability in the response of normal murine hematopoietic progenitor cells to extracorporeal photochemotherapy

Ichiro Tsujino, Fritz Sieber

PHOTOSENSORY BIOLOGY

815 Riboflavin photodegradation and photosensitizing effects are highly dependent on oxygen and ascorbate concentrations

Arnauld de La Rochette, Eduardo Silva, Inès Birlouez-Aragon, Marcelo Mancini, Ana-Maria Edwards, Patrice Morlière

RAPID COMMUNICATIONS

821 Near-infrared two-photon excitation of protoporphyrin IX: Photodynamics and photoproduct generation

Rebecca L. Goyan, David T. Cramb

i Contents, Vol. 72

xiii Author Index, Vol. 72

xvi Subject Index, Vol. 72
